Poster paint

Kind of paint

Poster paint is a distemper paint that usually uses starch, cornstarch, cellulose, gum-water or another glue size as its binder. It either comes in large bottles or jars or in a powdered form. It is normally a cheap paint used in school art classes. Wikipedia

## Poster Paint vs Acrylic Paint: What's the Difference and ...

### What Is Poster Paint?

### What Are Acrylic Paints?

### Which Is Better, Acrylic C

Poster paint is an opaque water-based, inexpensive paint made of a glue-based binder and a rich pigment. This type of paint was specifically designed for use on posters and papers to get bright, vibrant colors. It dries faster than acrylics to a matte, chalk-like finish, but poster paint is not permanent. It comes in liquid or powder form, often in ...
